

SNS 2022

ENERGY INTEGRATED
IN THE EAST

Exhibitor Guide

65

4C Offshore

4C Offshore is the leading market intelligence organisation targeting global offshore renewable energy markets. We are a marine consultancy with a specialist focus on submarine electricity cable providing advisory, management and owner engineering to the marine, energy and subsea sectors. With a combination of in-house developed tools and systems, a dedicated team of analysts, researchers and sector experts, we shall provide you with comprehensive understanding and insights of the market and its dynamics.

M1

Altrad

Altrad is a world leader in the provision of industrial services, generating high-added value solutions principally for the Oil & Gas, Energy, Power Generation, Process, Environment and Construction sectors. The Group is also a recognised leader in the manufacturing of equipment dedicated to the Construction and Building market.

26

Armultra

A leading fabrication and engineering company for the Renewable, Oil and Gas, Nuclear, petrochemical, and Decommissioning industries. Supplying Pipework, Structural fabrication, and personnel onshore and offshore including rope access. We have in house design and project management capabilities and carry out training such as GWO & WAH by qualified staff.

25

ASCOWORLD.COM

ASCO UK

ASCO is the leading logistics and materials management supplier for the energy industry, providing the world's largest operators with solutions underpinned by the three pillars of safety, service excellence and sustainability. Digitalisation is at the heart of all operations and innovative processes ensure ASCO is at the forefront of driving supply chain efficiency.

24

Associated British Ports

We are Associated British Ports, the UK's leading and best-connected ports group and we are Keeping Britain Trading. As a vital part of the supply chains of businesses throughout the nation, our 21 ports support 119,000 jobs and contribute £7.5 billion to the economy every year, handling £150 billion of trade.

14

AST Applied Telematics

With over 25 years of experience in delivering satellite communications services, AST is a trusted global satellite communications equipment supplier of end-to-end remote communication solutions. Our company provides a comprehensive range of terminals and devices, high quality voice and data connectivity.

35

Bacton Energy Hub

Bacton is strategically located to generate hydrogen that will contribute to the decarbonisation of London and the South East. SNS hydrocarbons can be processed into zero carbon fuels with the CO2 captured and stored offshore (blue hydrogen). SNS wind farm electricity can power the electrolytic production of hydrogen (green hydrogen).

37

Barclays

Our passion is innovation and growth. So much so, that in 2015 when under used Barclays spaces became available we created Eagle Labs, a network made up of member businesses, partners, investors, corporates, mentors, banking expertise and so much more.

48

Birketts

Birketts is a full service, top 100 UK law firm. With a rich heritage spanning over 150 years we've built an enviable track record advising businesses, institutions and individuals in the UK and internationally.

33

Brand Energy and Infrastructure Services UK Ltd

BRAND® develop inspection & maintenance plans around your needs, utilising appropriate product/labour combinations, from scaffolding, QuikDeck® or rope access to blasting, painting and insulating. Everything your facility or platform requires to operate effectively and safely. Harnessing global resources, we deliver high-quality inspection & repair, term maintenance or newbuild capital projects.

M2

Buildstream

BuildStream is a software platform which helps companies hire and pay labour only contractors, without paying any agency fees.

28

CeraPhi Energy Ltd

CeraPhi Energy is a development company focused on impacting change to carbon reduction, providing a decarbonising baseload 1-2-1 energy transition solution. Using expertise from years of Oil and Gas production, we are tapping into experience and resources to unlock more than six billion years of energy stored under our feet. Geothermal energy is everywhere for everyone.

44

CHARLES HODGE PHOTOGRAPHY & VIDEO PRODUCTION
OFFSHORE ENERGY MEDIA SERVICES

CHPV Offshore Film & Photography

CHPV has been filming and photographing impressive feats of engineering and industry on land, sea and air, for more than 58 years with a 100% safety record, becoming Europe's most experienced offshore media company, offering global coverage and clients including many of the largest players in the offshore industry.

61

Correll
GROUP

Correll Group

Specialising in the renewable energy sector, Correll are a recognised leader in the provision of contracting and maintenance services - including High Voltage (HV), Low Voltage (LV) and Fibre Optic (FO) Engineering, Control Room Asset Monitoring, HV Safety Rules, Construction Support and Service Operations and Maintenance.

62

CPower

CPower is a young company founded on the knowledge, networks and experience of Peter Jorgensen alongside a close network of highly experienced colleagues. Operating in Off and Onshore Wind, Oil & Gas, as well as the Nuclear sector. Supplying a wide range of services from Man Power to Temporary Power.

67

Decom North Sea

For over a decade Decom North Sea has connected capability with opportunity across the decommissioning sector, internationally. Working across the energy sector - renewables, oil & gas, and nuclear - the organisation works to share knowledge, facilitate collaboration, and maximise business potential for members.

08/9

East Coast College

East Coast College and East Coast Energy Training Academy support local, regional and national training needs of a wide range of companies. The Lowestoft Energy Centre hosts a wide range of outstanding resources to support the Energy and Engineering sectors.

07

ECITB (Engineering Construction Industry Training Board)

The employer-led skills, standards and qualifications body for the development of Great Britain's engineering construction workforce. Working with employers and training providers to attract, develop and qualify the engineering construction workforce in a wide range of disciplines, ECITB invests over £20 million annually to support skills development within the industry.

EEEGR

The East of England Energy Group (EEEGR) represents more than 200 members across the region, ranging from energy producers to supply chain companies. EEEGR is a key voice for the sector, putting the region and its expertise on the radar of major international players and influential politicians at regional and national levels.

Elmdale

A partnership with global scope delivered by local family values, ESAB and Elmdale have been supplying quality welding machinery, consumables and expertise into the energy sector for over 30 years. We pride ourselves on the provision of quality products and services, delivered safely and effectively.

EnerMech

EnerMech are a global services company specialising in critical asset support across the asset lifecycle from pre-commissioning to decommissioning.

Equinor

Equinor is a broad energy company that aims to be a leader in the energy transition and is developing as an offshore wind major. We are a long-term partner for Norfolk and have been an active community member for over a decade through the Sheringham Shoal and Dudgeon wind farms.

Fern Communications

From our global network of more than 60 locations, we provide a range of integrated services to the energy sector including offshore containers and modular solutions, welfare units, temporary power, radio communications as well as topside and subsea services.

Flameskill

Flameskill has been established for over 30 years and are specialists in the supply, service, maintenance and recertification of an extensive range of firefighting, safety and respiratory equipment. All our service technicians are third party accredited and certified to carry out operations on both offshore oil platforms and windfarm installations.

56

Fristads

Fristads is an independent provider of Fire Protection and Safety Equipment supply, service and maintenance and recertification.

M4

Unlimited opportunities in the East of England

GENERATE

Your gateway to investment and growth in the East of England's energy sector. With projects worth billions of pounds, versatile offshore energy ports, a highly skilled energy supply chain and unrivalled centres of energy innovation - there's space to grow and thrive in the UK's clean growth region.

10

Gibb Group

Gibb Group is one of the energy sectors most experienced and qualified suppliers, specialising in supply to Oil & Gas, Marine and Renewables. Experienced people, in specialist divisions, supplying clients with reliable and cost-effective solutions. Our product ranges are backed up by services and facilities that add genuine value for our clients.

38

Glamox

Glamox is the leading lighting manufacturer to the world's Oil & Gas, Offshore Windfarm and marine industries (Cruise & Ferry, Navy). Our vast experience includes the most extreme conditions both offshore and onshore. With over 70 years of manufacturing experience using our world class laboratories, nine global factories and a talented and experienced team of over 3,000 employees we are the go to company for all your lighting requirements. We manufacture fittings with minimal operational maintenance suited for all harsh and hazardous installations.

00

Global Underwater Hub

The Global Underwater Hub is a strategic, intelligence-led organisation that is transforming the UK's £8bn underwater industry into one of the country's largest industries, accelerating the drive to net-zero, creating high value jobs and exports. The GUH harnesses expertise to enable companies to successfully compete in the offshore energy, defence, aquaculture and telecoms sectors.

57

Great Yarmouth Borough Council

Great Yarmouth has an unmatched combination of capability, experience, skills, knowledge, supply chain and infrastructure to support the offshore energy sector. It also boasts the newest deep-water port in the UK, EastPort UK.

13

HTL

HTL Group are controlled bolting and joint integrity specialists. Headquartered in the North-East of England with strategically located facilities across the UK, HTL offers a range of products that include hydraulic cutters and nut splitters, equipment services and training solutions focused primarily on bolting and joint integrity operations.

66

Hytorc

HYTORC's mission is to optimize safety, quality and schedule in industrial bolting through innovative solutions. We make industrial bolting safer and simpler. We offer a full line of superior hydraulic, pneumatic and electric torque & tension tools that feature the most advanced technology available.

M5

Inspection Verification Bureau Ltd

Inspection Verification Bureau Ltd is a dynamic and flexible company with a worldwide reach, providing competitive Independent Third Party Inspection and Verification Services to the world's oil, gas, construction and renewable industries.

58

Jarrold Training

Jarrold Training is a leading provider of quality business training solutions across Management, Business Skills, Health & Safety and IT. We work with organisations throughout East Anglia and have a long association with clients in the East of England Energy sector.

54

KAEFER

KAEFER UK & Ireland provides a large and growing range of industries with asset integrity services including access solutions, insulation, inspection & testing, protective coatings, asbestos management and more. The company currently has thirteen operating centres across the UK and Ireland, employing approximately 3,000 highly skilled and experienced people.

M3

Milltech

Milltech is a precision machining facility operating from a 30,000 ft² facility based on the outskirts of Norwich utilising top of the range CNC Machine tools, we offer a complete manufacturing solution with the ability to support a range of complex projects, our aim to develop long-term working partnerships and we form part of a large industrial group Indutrade.

60

Nesspoint

Nesspoint

Nesspoint designs and builds communication, tracking and monitoring systems for renewables, ports, harbours and defence facilities worldwide. Our expertise covers VTS, RADAR, CCTV, AIS, VHF, DMR, TETRA and meteorological sensors, plus site wide operational technology networks. We also offer bespoke software as well as providing integration services bringing technology together.

12

Next Geosolutions UKCS

A leading player in international marine geoscience and offshore construction support services, Next Geosolutions combines the knowledge, expertise, and resources of teams and individuals with over 30 years of success in the offshore industry with its technical and operational capabilities, resulting in true turn-key solutions covering the entire lifecycle of projects.

52

Norfolk County Council

Norfolk is the fifth largest shire in England, with a population approaching 900,000 and one of the largest county economies: 37,000 businesses, 348,000 jobs, worth £18m, a net contributor to the UK PLC. Visit Norfolk County Council at stand 52 to discover our business support skills and grants offer.

39

North Sea Transition Authority

The NSTA regulates and influences the oil, gas and carbon storage industries. We help drive the North Sea energy transition, realising the significant potential of the UK Continental Shelf as a critical energy and carbon abatement resource. We hold industry to account on halving upstream emissions by 2030.

M7

North Star Renewables

North Star Renewables is the largest British wholly-owned fleet engaged in the UK offshore industry.

34

ODE

ODE is an international technical service provider to the renewables, oil and gas, and energy transition industries. With UK offices in London, Great Yarmouth and Aberdeen, ODE is committed to being an energy for change and a trusted engineering partner in a transforming industry.

31

Opergy

Established in 2019, Opergy is a consultancy with a difference. Our multi-disciplinary teams help businesses to get started, scale-up and become industry leaders. We support our clients to make clear decisions that drive innovation, growth, and a positive impact on people, places, and the planet.

11

OPITO

OPITO is the global skills and standards body for the energy industry. Up to 375,000 people are trained to OPITO Standards every year, across 50 countries, through more than 230 accredited training Centres. OPITO works to develop a safe, skilled, and mobile workforce by driving global standards and qualifications.

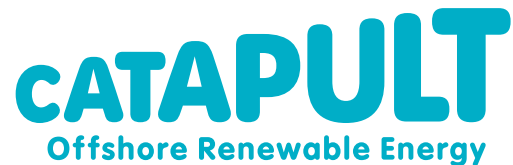

29

OrbisEnergy

A landmark clean energy innovation and incubation hub offering exceptional workspaces, conference and meeting rooms and virtual office solutions (VIP). Our 'easy in /easy out' tenancies and VIP service includes meeting room allocations, dedicated telephone lines, call handling, reception services, onsite parking and access to industry events and networking.

40

ORE Catapult

ORE Catapult was established in 2013 by the UK Government and is part of a network of Catapults set up by Innovate UK in high growth industries. It is the UK's leading innovation centre for offshore renewable energy and helps to reduce the cost of offshore renewable energy, supporting the growth of the industry and creating UK benefit.

05

Petans

Petans provide professional emergency response, safety and survival training for the offshore energy sector both in the UK and worldwide. Petans deliver accredited training to the requirements of OPITO, MCA, HSE, GWO and City & Guilds as well as providing specific training requirements to the wider energy sector and beyond.

43

Peterson

Peterson provides integrated logistical support to major energy clients and have various North Sea bases. Logistic services include: Supply Base Operations - Cargo Handling, CCU Rental, Fuel Services, Vessel Chartering / Vessel Sharing Freight Forwarding & Customs Formalities Marine Technical Services / Inspections Recruitment, Procurement, Agency, Consultancy Decommissioning.

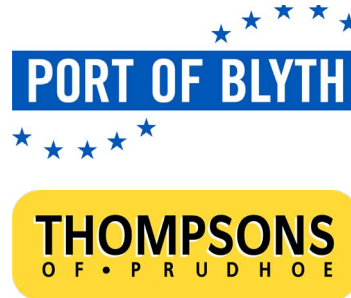

22

Petrofac Offshore Projects & Operations

Petrofac is a leading international service provider to the energy industry. Our purpose is to enable our clients to meet the world's evolving energy needs. We support projects across the O&G, wind, hydrogen, carbon capture utilisation & storage (CCUS) and waste-to-value sectors, and our services span the asset life cycle.

01

Port of Blyth & Thompsons of Prudhoe

The strategic partnership between leading UK offshore energy support base Port of Blyth and specialist decommissioning and demolition contractor Thompsons of Prudhoe, offers a fully licenced, flexible quayside facility with a highly experienced and safety conscious team ready to support all major decommissioning projects taking place in the North Sea.

47

Proeon

Proeon are a specialist systems integrator with unparalleled expertise and experience with an extensive industry knowledge, who provide packaged safety and control solutions to critical industry sectors; from specialist Consultancy to full turnkey EPCIC of high integrity integrated control and safety systems.

02

People with Energy

Established in 1983 in the heart of the East of England, we've built strong and lasting relationships across the world. We've grown from providing services for O&G and Nuclear to cater for the Offshore Wind sector. We supply personnel across the UK and worldwide onto major projects, covering on and offshore roles.

51

Remote Medical International

RMI provides clinically registered medical incident response & safety services to renewable energy and oil & gas companies operating in remote, high-risk locations on and offshore. We support our clients globally, keeping your people safe and your operations running offering: medical/paramedics, HSE staffing, 24/7 topside medical support, occupational health, bespoke risk management solutions.

04

RenewableUK

RenewableUK is the trade and professional body for the UK wind industry.

49

Safepoint

Safepoint helps businesses keep their team protected and organised, wherever they are. Organisations such as Mitsubishi, Anesco, Babcock, Michelin and the NHS trust Safepoint to protect their lone workers and at-risk staff. Through their user-friendly apps, clever wearable devices and 24/7 monitoring service, Safepoint provides a comprehensive, award-winning service.

27

Score Group Limited

Score Group is a specialist engineering solutions provider.

41

ScottishPower Renewables

ScottishPower Renewables is part of the ScottishPower group of companies operating in the UK under the Iberdrola Group, one of the world's largest integrated utility companies and a world leader in wind energy.

23

Seabed Scour Control Systems Ltd

Seabed Scour Control Systems (SSCS) offer nature-based engineering solution to seabed erosion (Scour). These solutions last life of field, prevent any further maintenance work and return the seabed to its natural condition. SSCS Lifting provide specialist lifting services from manufacturing slings to testing and certification of equipment.

42

Seajacks

Seajacks are a UK based offshore installation company committed to building the world's most advanced and versatile fleet of self-propelled jack-up vessels to service the demands of the offshore industry. Seajacks work in full conjunction with all our clients, looking to provide the most cost-effective solutions in the safest environments possible.

03

Seaward Safety

The Sign Of Quality; Seaward Safety has almost 30 years' experience surveying, designing, manufacturing, and installing signage, of all types, for our global customer base. We specialise in Transition Piece and Platform Identification Signs, Safety Signage, Low Location Lighting, Pipe Markers, Bespoke Signage Boards, Life Saving Appliance Plans, and Anti-slip Products.

19

Seaway 7

Seaway 7 is a global leader in the delivery of fixed offshore wind projects, committed to contributing to an efficient and sustainable energy supply for the future.

59

Seiche Group

Seiche specialises in underwater acoustics, noise measurement, visual monitoring and environmental technology and service solutions for the global offshore marine industries. Our Engineering, Environmental, Logistics, Bioscience and Training teams can provide bespoke solutions for all project sizes.

30

Sizewell C

Sizewell C, the new planned nuclear power station in Suffolk, will generate enough low-carbon electricity to supply six million homes. It will support 70,000 jobs across the UK and rely on over 3,000 UK-based suppliers, creating thousands of local jobs and contribute around £4 billion to the regional economy.

32

Skills for Energy

Skills for Energy works to ensure there is an ongoing pipeline of talent entering the energy industry. We engage with a range of individuals looking to enter the energy sector to raise awareness of the broad range of career opportunities within it and aim to improve the diversity of the workforce.

53

Spectrum Offshore - Geosurvey

The survey services offered by Spectrum Offshore use a wide variety of state-of-the-art technology, including the following methodologies: high-resolution multibeam bathymetry & backscatter, side scan sonar, shallow seismic & parametric sub-bottom profiler, magnetometer & gradiometer, RTK positioning, drop-down video cameras, grab sampling, unmanned aerial vehicles and remote survey.

64

Subsea Technology & Rentals Ltd

Subsea Technology & Rentals Ltd (STR) specialise in the design and manufacture of advanced subsea technology for the offshore energy industry. STR is also a global leader in the rental of marine equipment to support the offshore survey, IRM, subsea construction and renewable sectors.

Suffolk Chamber of Commerce - Sizewell C Supply Chain

Suffolk Chamber of Commerce has partnered with EDF Energy to support the supply chain for Sizewell C to ensure that the opportunities are managed efficiently and effectively. To do this, Suffolk Chamber has set up a Sizewell C Supply Chain team which is providing a range of support services, including managing the Sizewell C Supply Chain website portal.

TECOSIM

A market leader in digital product development, increasing performance, optimising reliability and reducing cost of products for over 25 years. We deliver innovative solutions by building flexible development partnerships to bring your ideas to life.

TRINITY HOUSE

Trinity House

Provision and maintenance of aids to navigation and vessel operation make up Trinity House's core business and our reputation is world class.

Turner IcenI

Turner IcenI have been involved in every stage of the wind farm life cycle. Experience has been gained from supporting survey and planning work in the early stages, to assisting asset owners, Tier1 suppliers and OEM customers with re-powering, certification and life extension decision making at the possible end of a project.

University of East Anglia

UEA

UEA's world-leading research tackles the challenges facing the energy industry head-on, developing novel technologies, identifying solutions for society and the environment and influencing policy and regulation. Our 21,000+ students and recent graduates have the talent to transform your business, giving your workforce an injection of dynamism, fresh thinking and enthusiasm.

Marine ingenuity

Van Oord Offshore Wind

With 20 years' proven experience and an impressive track record in constructing offshore wind projects, Van Oord is leading the way in the transition towards renewable energy. In 2019, we completed offshore wind farm projects that deliver renewable energy to over 2.5 million households. With our safety standards, innovative solutions, our employees' knowledge and expertise, and specialised offshore wind equipment, we are significantly contributing to making wind energy more competitive.

Vattenfall

You might expect an energy company to only do energy. But to live fossil free tomorrow, we need to think beyond convention today. At Vattenfall, that's the mindset that drives everything we do. It's why we're collaborating with partners from beyond the energy sector to decarbonise entire industries and help make fossil free living a reality.

Virginia Beach Economic Development

If you are entering the US offshore wind market, we can help. Virginia Beach will be the home of the USA's two largest offshore wind projects, totalling over 5GW. UK companies are already setting up shop in Virginia Beach to service them and other projects up and down the East Coast.

Well Services Group (WSG)

Well Services Group have an extensive track record providing customers with full life cycle support to their assets, covering commissioning and start up, shutdowns, outages, operations and decommissioning. Their experienced team provide an integrated and managed service with industry leading innovative solutions that span oil & gas, clean energy, nuclear, renewables and de-carbonization.

Wood Group UK Limited

Wood Group UK is a global leader in consulting and engineering & construction.
