

North Sea Transition Authority Conference: 60 Years of Gas – Powering the Future beyond 2050

Tuesday 8 September 2026: Legends Function Room, Norwich City Football Club

Agenda

0900-0930

Registration and coffee

0930-0950

Welcome and Introductions:

Adam Bradley, NSTA
Kevin Keable, EEEGR

Session 1: Maximising Late-Life Recovery

0950-1005

Shorter surveys and real-time answers from
Distributed Fiber-Optic Diagnostics

Ehsan Nikjoo, Weatherford

1005-1020

Targeted Water Shut-Off for Mature Offshore
Wells

Chris Laing, Interwell

1020-1040

Babbage Gas Field: Creating Long-Term Value
Through Operational Efficiency

Curtis Bracher, Neo Next

1040-1100

Maximising late life production from the world
class Morecambe Field Hub

Stephen Milner, Spirit Energy

1100 Break and Networking

Session 2: Delivering Lower Emissions Projects

1120-1135

Beyond Diesel: A Modular Renewable Power
Platform for New Build, Hybrid and Late-Life
Offshore Assets

Willem van der Merwe, Amphibious Energy

1135-1155

Platypus Development

Ross Barrett, Perenco

1155-1215	Maximising Recovery whilst Minimising Footprint through the use of Digital Slickline	Arthur Merrick, Paradigm
1215-1235	Chemical Treatment for Enhanced Production	Dugald MacDougall, Reda Energy

1235 Lunch / Opportunity Marketplace

Session 3: New Technology to deliver Leaner Developments

1400-1415	Fishbones, Unlocking reservoir value by branching beyond the wellbore	Jeremy Mazzilli, Fishbones AS
1415-1430	Seeing the Unseen: Acoustic Imaging for Well Integrity and Tubing-Annulus Diagnostics in Mature Wells	Zachary Evans, Darkvision
1430-1450	Cygnus Field- Maximising Recovery Through Innovation, Technology Deployment and Sustained Investment	Vincent Verlinden, Ithaca Energy
1450-1510	Novel Compression Systems Enable Maximization of Gas and Condensate Production	Kuo-Chiang (K-C) Chen, Upwing Energy
1510-1530	Earlham Gigagrid	Steve Brown, Orcadian Energy

1530 Break

1545-1615: Breakout tables session – Exploring key issues raised and actioning

1615	Closing remarks	NSTA
